PROFESSIONAL EXPERIENCE

Full Stack Software Engineer (Hop)

2024 – Present | United Kingdom

Hop is a collaborative web app enabling Shareable Browsers for watch parties, project collaboration, and seamless browsing experiences.

- Built scalable, high-performance applications using Next.js and collaborated in Agile sprint task assignments.
- Utilized GitHub Actions for automated workflows and implemented TypeScript for enhanced code quality and consistency.
- Designed and developed responsive UI components while ensuring robust data security protocols.
- Worked closely with the backend team to define API endpoints and integrated real-time features using WebSocket.
- Collaborated with the team throughout the development lifecycle, from design to deployment, ensuring a smooth process.

Software Engineer (PawGang)

2024 – 2024 | United Kingdom

PawGang, a mobile app for scheduling dog park visits and playdates.

- Integrated TypeScript in the codebase to improve type safety, enhance code clarity, and boost developer productivity.
- Set up Jest for comprehensive testing frameworks to ensure app stability and long-term reliability.
- Optimized the app for various screen sizes, proactively resolving performance bottlenecks and enhancing user experience.
- Improved legacy code by refactoring and enhancing technical processes without introducing regressions.
- Contributed to QA efforts by writing automated tests with Jest to maintain high-quality coding standards.

Manager of Sales - Retail (Morrisons)

2019 – 2023 | United Kingdom

Led store operations, driving sales growth, and enhancing team performance over 3 years.

- Enhanced sales by building strong client relationships and implementing strategic initiatives to drive growth.
- Supported team development and collaboration, ensuring smooth store operations and maintaining productivity.
- Streamlined inventory management and optimized scheduling processes, improving overall efficiency.
- Boosted customer satisfaction by implementing service initiatives and creating a more engaging in-store experience.

IT Hardware Assistant (Kingston Collage)

2017 – 2018 | United Kingdom

Provided hardware support and ensured all software was up-to-date and functioning properly.

- Maintained and optimized hardware systems, ensuring high availability and minimizing operational downtime.
- Performed regular software updates and troubleshooting tasks to enhance overall system performance and security.
- Collaborated with cross-functional teams to efficiently resolve technical issues and support smooth IT operations.

PROJECTS

Full Stack Software Engineer (Trace)

2024 – Present | United Kingdom

Trace is a mobile app that centralizes virtual activities, integrating data and communication across platforms.

- Integrated front-end components with backend APIs, ensuring smooth data handling and communication between services.
- Managed the app development lifecycle from start to finish, transforming the project vision into a fully functional product.
- Implemented TypeScript to enhance error handling, improve code reliability, and ensure consistent functionality.
- Developed the app using React Native and Expo, ensuring scalability and broad compatibility across multiple platforms.
- Delivered a user-friendly interface and seamless experience, driving front-end initiatives from ideation to deployment.

EDUCATION

Software Engineering Immersive, Codeworks

2024 – 2024 | United Kingdom

Information Technology, Kingston College

2015 – 2018 | United Kingdom
